Project Title

Event & Conference Management System

Group Members

- **Zeinab Shaker Mohamed (Roll Number: 202511094)**
- **Mozan Yasir Mohamed (Roll Number: 202510003)**

Business Idea & Problem Statement

- Managing modern academic and professional conferences requires an organized framework to handle registrations, scheduling, guest speakers, and ticketholders. Without a centralized system, organizers face difficulties tracking seating availability, speaker allocations, and attendee details, leading to data redundancy and scheduling conflicts.

The Event & Conference Management System provides a structured digital platform to model and track core entities, ensuring efficient record-keeping and smooth event management

Scope of the System

- Included in Scope:

Recording attendee registrations and contact details.

Storing speaker profiles and area of expertise.

Scheduling sessions with time and room assignments.

Issuing tickets to attendees with status and pricing.

Excluded from Scope:

Online credit card payment gateway execution.

Live video streaming services.

- **Core System Entities & Responsibilities**

- **Attendee:** Stores participant personal data and manages event registrations.
- Speaker: Holds professional profiles of experts delivering sessions.
- Session: Manages talk topics, venue locations, and schedule times.
- Ticket: Handles access authorization, ticket types, and status.
